Submission File: README Document (`README.md`)

Author: Ritika Sonali Suryawanshi | Sandip University, Nashik | Project Topic #10

Project Title

Enterprise Ransomware Assessment: Drafted a corporate risk register mapped to the NIST CSF framework

Overview & Purpose

This project delivers an enterprise-level ransomware risk assessment. It establishes a quantitative and qualitative corporate risk register structured around the five core functions of the **NIST Cybersecurity Framework (NIST CSF 2.0)**: *Identify, Protect, Detect, Respond, and Recover*.

Project Deliverables

- **Code File (`ransomware_assessment.py`):** Python script generating the risk matrix.
- **Requirements File (`requirements.txt`):** Environment dependency list.
- **Project Report (`ransomware_assessment_report.pdf`):** Full technical documentation.
- **README File (`README.md`):** Setup, structure, and execution guide.

Execution Instructions

1. Install dependencies: `pip install -r requirements.txt`
2. Run assessment tool: `python ransomware_assessment.py`
3. Output: Generates structured `corporate_risk_register.csv` file.

Declaration

I, **Ritika Sonali Suryawanshi**, student at **Sandip University, Nashik**, declare that this README document and associated deliverables represent authentic coursework completed for the Cybersecurity Bootcamp.
